

Certificate Course of Organic Composting

Course duration: 3 Month

Class: B.Sc. III Year

Course Type: Certificate Course

Compost Operation Training Course:

This is 30 hrs. course focuses on giving you the knowledge you need to run a successful composting facility, whether you're just getting started or have been composting for a while. In addition to in-depth lectures, the course provides hands-on practice through indoor and outdoor activities as well as tours to local facilities, where the theories meet reality. From compost operators to environmental and agricultural consultants to local and state regulators; the Compost Operations Training Course is for anyone who wants quality instruction from leading composting professionals and educators on the art and science of commercial scale compost production and marketing.

CURRICULUM:

Week 1: Composting process, feed stocks and recipe development, compost systems

Week 1: Equipment, safety, site design, environmental protection (odours and storm water)

Week 2: Regulations, composting facility tours

Week 2: Compost testing, product quality, compost uses and marketing

Week 3: Facility management, trouble-shooting and analysing compost piles

Certificate course can last up to 1 month duration that varies from course to course. With the support of certificate course students can easily make out their best choice as per their interest and career goals.

Certificate courses can help you develop the skills and experiences necessary for entrepreneurship and for people who want to boost their skills or looking for a mid- life career change.

Benefits of Certificate Course:

- There are many benefits of certificate course. If you are a student or starting your job search, completing a certificate program will boost your skills & abilities, and will make you stand out in the job as marketing.
- Even if you already have a career you may still benefit from certificate program to have a particular skill.
- Department of Microbiology has developed a certificate course in “Organic composting” to make Microbiology students learn about why composting is so important and how easy it is to make compost entirely from organic matter.
- Composting is the process of giving life back to your soil using organic materials.
- In this course a student gain practical knowledge about making compost at home with kitchen waste. Vinegar & egg shell fertilizer practical preparation of compost.

Program Outcome:

- By doing this course, students learn how to use organic waste to grow plants without chemical fertilizers.
- In addition students can save money not only for household gardens, but it can also help to balance city's budget.
- Students can generate income by making their own compost & selling it to farmers or organically growing fruits are high in demand.
- Students get knowledge about different types of compost preparation to save soil, they can become entrepreneur by setting up composting business and can literally "make out of trash".

Date: 04/09/2019

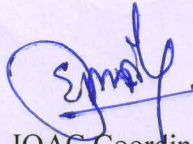

Notice 2019-20

All the students of Science faculty of Gramgeeta Mahavidyalaya, Chimur are hereby informed that Department of Microbiology is going to start Certificate Course in Organic composting. Interested students can register their name to Course Coordinator Dr. Yuvraj G. Bodhe or Asst. Prof. Rohit D. Chandekar at the Department of Microbiology, within 8 days from the notice. This course will be resumed on the 16/09/2019.

Final Examination - Certificate course on Organic composting

Time : 1 Hour

Marks : 50

- Q. 1. The process of burning of municipal solid waste at high temperature is called _____
- a) **Incineration**
 - b) Composting
 - c) Land filling
 - d) Shredding
- Q. 2. Which of the following is a biodegradable waste?
- a) Polythene bags
 - b) Synthetic fibre
 - c) **Food waste**
 - d) Paper
- Q. 3. In which method of disposal of municipal solid waste, the waste is dumped in the soil?
- a) Incineration
 - b) Composting
 - c) **Land filling**
 - d) Shredding
- Q. 4. Which of the following is correct regarding disposal of waste by land filling?
- a) Economical method
 - b) Preferred in low lying areas
 - c) **Foul gases are not produced**
 - d) Separation of different types of waste not required
- Q. 5. The density of ash produced in the municipal solid waste is _____
- a) 100 kg/m³
 - b) 450 kg/m³
 - c) **700 kg/m³**
 - d) 1000 kg/m³
- Q. 6. The process of decomposition of biodegradable solid waste by earthworms is called _____
- a) Land fills
 - b) Shredding
 - c) **Vermi-composting**
 - d) Composting
- Q. 7. The waste produced in cotton mills are _____
- a) Municipal solid waste
 - b) Non biodegradable waste
 - c) Hazardous waste
 - d) **Non hazardous waste**

Head
Department of Microbiology
Gramgeeta Mahavidyalaya, Chimur

Q. 8. Which of the following is not the land filling method?

- a) **Bangalore method**
- b) Area method
- c) Depression method
- d) Trench method

Q. 9. _____ is a liquid that passes through solid waste and extracts suspended impurities from it.

- a) **Leachate**
- b) Sludge
- c) Distilled water
- d) Municipal waste

Q. 10. Which of the following is not the municipal solid waste?

- a) **Radioactive substance**
- b) Ashes
- c) Food waste
- d) Rubbish

Q. 11. Which of the following waste can be decomposed by bacteria?

- a) Radioactive substance
- b) Ashes
- c) **Food waste**
- d) Rubbish

Q. 12. _____ is the cutting and tearing of municipal solid waste.

- a) Land fills
- b) **Shredding**
- c) Pulverization
- d) Composting

Q. 13. _____ is the crushing and grinding of municipal solid waste.

- a) Land fills
- b) Shredding
- c) **Pulverization**
- d) Composting

Q. 14. In which method of composting, decomposition of anaerobic waste takes place?

- a) Indian method
- b) Depression method
- c) **Bangalore method**
- d) Trench method

Q. 15. Which of the following is a biological method of disposal of municipal solid waste?

- a) Land fills
- b) Shredding
- c) Pulverization
- d) **Composting**

Q.16. Which of the following is known to decompose the organic matter of wastes?

- a) **Composting**
- b) Cooking
- c) Decomposing

d) Burning

Q. 17. Which of the following is not an objective of composting?

- a) Reduction of mass
- b) Elimination of toxic substances
- c) Stabilization
- d) **Incineration**

Q. 18. What of the following microorganisms have a major role in composting?

- a) Bacteria
- b) Fungi
- c) **Plants**
- d) Actinomycetes

Q. 19. Which of the following components are present in the waste air of aerobic respiration?

- a) Ammonia
- b) Nitrous oxide
- c) Carbon dioxide
- d) **Methane**

Q. 20. Which of the following methods cannot be used for gas exchange in the heap?

- a) Releasing the rotting material
- b) Forced aeration
- c) Maintaining the oxygen demand
- d) **Tightening the rotting material**

Q. 21. Which of the following mechanism can optimize the input of hazardous metals?

- a) Hydrolysis
- b) **Addition of heavy metals**
- c) Conditioning
- d) Solubilisation

Q. 22. Which of the following method is not a post processing activity?

- a) Sieving
- b) **Landfill sealing**
- c) Drying
- d) Disintegrating clumps

Q. 23. Which of the following methods leads to increase of surface area for microorganisms to act?

- a) Vermicomposting
- b) **Disintegration**
- c) Incineration
- d) Recycling

Q. 25. Which of the following methods enhance the intensity of disintegration?

- a) Velocity of degradation
- b) Time of process
- c) Composting process
- d) **Recycling**
