World's AIDS Day-2020

"Global Solidarity, Shared Responsibility"

1st December, 2020

RRC Club of Gramgeeta Mahavidyalaya, Chimur organized program on "World's AIDS Day" on 1st Dec 2020 in collaboration District s AIDS Control and Prevention Unit of Chimur, District Chandrapur. This programme was organized and Proposed by the Ministry of Health and Family Welfare and NACO due to Covid 19 through DACPU and RRC club of every City. The main theme was this program were "Global Solidarity, Shared Responsibility" because of due to create awareness all over the world regarding this deadly viral disease. During this program total 50 students were participated. In this program various issues were discuss and concludes that how can we keep our self away from HIV infection and follow its preventive measures and protection and control. This programme is providing platform of various NGO, UNICEF and government to discuss about the status of AIDS.

Women and children are bearing the brunt of the COVID crisis in many of the same ways that they have borne that of the decades-long fight against HIV. Every minute and 40 seconds, a child or young person under the age of 20 was newly infected with HIV in 2020, bringing the total number of children living with HIV to 2.8 million. And the COVID-19 crisis has only further exacerbated inequities in access to life-saving HIV services for children, adolescents and pregnant mothers worldwide, according to the *Reimagining a resilient HIV response for children, adolescents and pregnant women living with HIV* report.

UNICEF's 2020 World AIDS Day report presents key global data and an overview of the HIV epidemic among children and adolescents, focusing on UNICEF's contribution to HIV prevention, treatment and care services in the global HIV response. The report also discusses the impact of the COVID-19 pandemic on UNICEF's results and achievements. Finally, the report concludes with a proposed way forward that highlights fighting stigma, which has been a persistent and debilitating challenge to people living with and vulnerable to HIV over the past four decades.

This report presents 2020 key global data and an overview of the HIV epidemic among children and adolescents, focusing on UNICEF's contribution to HIV prevention, treatment and care services in the global HIV response. It also includes the impact of the COVID-19 pandemic on UNICEF's results and achievements.

Prevention efforts and treatment for children remain some of the lowest amongst key affected populations. In 2020, a little more than half of children worldwide had access to life-saving treatment, significantly lagging behind coverage for both mothers (85 per cent) and all adults living with HIV (62 per cent). Nearly 110,000 children died of AIDS that year. And despite some progress, deep regional disparities persist among all populations, especially for children. Pediatric coverage of antiretroviral treatment is highest in the Middle East and North Africa, at 81 per cent, followed by South Asia (76 per cent), Eastern and Southern Africa (58 per cent), East Asia and the Pacific (50 per cent), Latin America and the Caribbean (46 per cent) and West and Central Africa (32 per cent).
